

# 2019 IW Best Plants Award Winners: A Salute to Excellence

IndustryWeek is pleased to showcase top performers in North American manufacturing. Meet our 30th class of honorees.

Jill Jusko | FEB 25, 2020

Excellence doesn't come easy. It's a challenge to achieve, and it's an even bigger challenge to maintain.

We at IndustryWeek know this to be true. Over the years our editors have been in hundreds of North American manufacturing facilities. We've watched and heard and learned about good manufacturing companies that are building workforces of hard-working employees, growing their competitiveness, learning from their mistakes and trying to do things right. We applaud their efforts.

We also know that there are manufacturing facilities that are doing even more. These manufacturers are delivering truly exceptional performances. They are creating rich, rewarding work environments internally and nurturing partnerships up and down the supply chain. They have embraced technologies that help them grow but never forget that people make the difference. These manufacturing plants know they must be better tomorrow than they are today, and never aim for less. These manufacturers recognize that excellence doesn't come easy.

These exceptional manufacturing facilities represent our 30th class of IndustryWeek Best Plants winners.

IndustryWeek will tell the stories of the 2019 IW Best Plants winners in the March/April print publication, and we will post the articles of each individual manufacturing plant online beginning the week of March 1

These facilities are truly exceptional performers.

IndustryWeek's annual quest to find and highlight these exceptional performers has concluded. We are pleased and honored to announce the 2019 IndustryWeek Best Plants Awards winners. They are:

- **All Metals Fabricating**  
Allen, Texas
- **Polamer Precision Inc.**  
New Britain, Conn.
- **SSP Fittings Corp.**  
Twinsburg, Ohio

At SSP, we are proud to be an American manufacturing success story.

**100% of our products are made in America.**

All of our manufacturing is performed in our 165,000 sq. ft. facility located near Cleveland, Ohio. Our facility is the largest vertically integrated, single-site operation in the industry. In addition to manufacturing and assembly, we have closed die forging, tool & die design, product development and testing operations under the same roof with the customer service and executive teams.

**Made in America is good business.**

Not only do we make everything in America, we use American suppliers too. Buying American allows us to have better quality control and a more reliable supply chain. We can work more closely within our walls and with our suppliers to improve quality, reduce costs, and shorten lead times, which means faster service and better products for you.

**Support where it counts.** SSP products and services are supported by more than 4000 people and 350 distributor locations around the globe. For a distributor near you, contact SSP Customer Service or visit [www.mySSPusa.com](http://www.mySSPusa.com)

## Valves

**Locked Bonnet Needle Valves**  
*LN and HLN Series*

**Rising Plug Needle Valves**  
*LP Series*
